Content : -

Therapeutic Use : -

## Product Description :

---

Our Pre+ Probiotics supplement is made in a GMP-certified, FSSAI-registered facility using only natural ingredients. It is also suitable for vegetarians.

### What is PRE+ Probiotics Supplement?

- Probiotics are a type of good bacteria. They colonize your digestive tract and aid in the movement of food through your intestines. Your digestive tract is where more than 70% of your body's immune system is located. Antibiotics, aging, stress, and fertilized foods all reduce beneficial bacteria in the gut, impairing immune function.
- Healthiza's PRE+ Probiotics supplement is a specially formulated concoction of many probiotic strains that target Gut Health and Immunity.

### Product Description

- Our gastrointestinal system contains numerous beneficial bacteria that are known as probiotics. PRE+ Probiotics supplement treat the gastrointestinal system by preventing the formation of dangerous microorganisms and preserving intestinal health. Toxins,

allergens, and pathogens can enter the body through damaged intestinal walls, which can result in a number of gastrointestinal disorders. Probiotics prevent their entry by preserving intestinal integrity, and their potential antibacterial effect aids in the management of digestive problems brought on by pathogens. Additionally, harmful bacteria affect the immune system in many ways and encourage inflammatory processes that result in a number of disorders. Probiotics work with the immune system to support healthy immunological function.

- Healthiza Pre+ Probiotics is a type of multi-strain probiotic that contains lactobacillus and bifidobacterium spp., which are the most common probiotics in the digestive system. Our Pre+ Probiotics may assist in reestablishing healthy intestinal flora, inhibiting the growth of infections and maybe assisting in maintaining a healthy immune response.

#### **Benefit of Pre+ Probiotics Supplement**

Here's how our PRE+ Probiotics supplement can help you unlock a tonne of advantages in just a few days.

#### **Encourages Digestion**

The beneficial bacteria found in the supplement help with bloating and digestion.

#### **Establishes Beneficial Bacteria**

It establishes a variety of helpful bacteria called Lactobacillus Rhamnosus in your digestive system. By establishing this, you can reduce the symptoms alleviate diarrhea, improve your gut health, and prevent cavities.

#### **Safeguards a Healthy Gut**

The most extensively studied probiotics, Lactobacillus, Bifidobacterium, or Saccharomyces boulardii, are found in probiotics with at least 1 billion colony-forming units. To ensure you receive the best, these are present in the supplement in considerably higher concentrations.

#### **Helps The Urinary Tract**

New research suggests that probiotics can be used to replenish naturally produced "good" bacteria, which aids in the prevention of UTIs. Probiotics are beneficial to your health and can benefit your digestive system as well as other body systems.

#### **Facilitates Control of Bowel Movements**

Bifidobacterium Irritable Bowel Syndrome, E. coli, and ulcerative colitis have all benefited from PRE+ Probiotics supplement.

#### **Reduce Frequent Flatulence**

You can safeguard yourself from excessive flatulence and gas problems with the active ingredients in natural Pre Probiotics.
