Product Description :

What is Acetaminophen 500 Mg Tablet?

Acetaminophen 500 Mg Tablet is used in the treatment of mild to moderate pain of headache, muscle pains, menstrual pain, sore throats, cold, toothaches, and vaccine reactions, as well as to lower fever. It can also be used to treat osteoarthritis pain.

Acetaminophen belongs to the class of analgesics (pain reliever) and antipyretics (fever reducer). It works by improving the way the body system experiences pain and by lowering the body's temperature.

How to Use

- Take an acetaminophen tablet by mouth, with or without food. Although acetaminophen is accessible without a prescription, your doctor may prescribe it for specific conditions.
- Carefully follow the guidelines on the packaging or prescription label. For children, give dose as per their weight or age. For more information consult your child doctor.
- Acetaminophen 500 Mg Tablet can also be paired with caffeine and aspirin to help ease

the pain of a migraine headache.

- Unless advised by your doctor, acetaminophen should not be used to treat pain for more than 5 days or in the fever treatment for more than 3 days.
- Keep this medicine at room temperature, away from the moisture and light and out of children's reach.

Precaution - Acetaminophen 500 Mg Tablet

- Tell your doctor about any prescription or over-the-counter medicines, vitamins, nutraceuticals, or herbal products you're using or planning to start. Your specialist may need to adjust your prescription dosages or keep a close eye on you for side effects.
- If you are pregnant, planning to become pregnant, or breastfeeding, inform your doctor.
- Do not use it if you consume three or more alcoholic drinks per day. While using acetaminophen, consult your doctor about the safe usage of alcoholic beverages.

Side Effects of Acetaminophen

- This medication normally has no negative side effects. If you experience any unexpected side effects, call your doctor immediately.
- If your doctor has prescribed Acetaminophen 500 Mg Tablet, keep in mind that your doctor has determined that the advantage to you exceeds the risk of negative effects. The majority of people who take this medicine do not have any substantial negative effects.
- This medicine rarely causes a severe allergic reaction. However, if you detect any symptoms of a major allergic response, such as a rash, swelling (face/tongue/throat), dizziness, or difficulty breathing, seek medical treatment immediately.
- This isn't a complete list of potential adverse effects. Contact your doctor if you experience any other side effects not listed above.
