**Brand name :** Calcium Carbonate & Vitamin D3

**Content :** Calcium Carbonate 500mg

**Therapeutic Use :** to treat osteoporosis,  
osteomalacia

## Product Description :

---

### What is Calcium Carbonate & Vitamin D3 Tablet?

Calcium Carbonate & Vitamin D3 Tablet is used in the treatment/prevention of low blood calcium levels in persons who do not consume enough calcium in their diet. It may be used to treat bone loss, weak bones, decreased parathyroid gland activity, and some muscle diseases that are linked to lower calcium levels. It could also be used to ensure that certain patients receive sufficient calcium. Calcium has a critical part of the human body. It is required for nerves, cells, muscle, and bone to function normally. If the blood calcium level is too low, the body will extract calcium from the bones, weakening them. Vitamin D aids in the absorption of calcium and phosphorus in the body. It's essential to get enough vitamin D, calcium, and phosphorus to build and maintain strong bones.

### How To Use

- This drug should be taken by mouth with meals. Calcium citrate can be consumed with or without food if your product contains it. Follow the instructions on the product container or your doctor's instructions.

- Extended-release pills should not be crushed or chewed. This can cause the entire medicine to be released at once, raising the risk of unwanted effects. Also, unless your doctor tells you to, do not divide the tablets until they have a score line.
- To receive the best benefit from this drug, take it on a daily basis. Take it at the beginning to help you remember.

#### **Precaution - Calcium Carbonate & Vitamin D3 Tablet**

- If you are sensitive to this drug or other vitamin D products, or if you have other allergies, notify your doctor before using it. Inactive chemicals may be included in this product, causing allergies or other issues.
- If you have specific medical conditions, you should not take this drug. If you have high calcium or vitamin D levels or trouble absorbing nourishment from food, talk to your doctor before taking this medicine.
- Tell your doctor if you have ever had heart or blood vessel disease, kidney stones, renal disease, specific immune system disorders, liver illness, certain bowel diseases, no or little stomach acid, low bile levels, or untreated phosphate imbalance before taking this drug.
- Before taking Calcium Carbonate & Vitamin D3 Tablet, inform your doctor if you are pregnant. Vitamin D doses higher than the dietary recommendations limit should only be administered when clearly needed during pregnancy. Consult your doctor about the dangers and advantages.
- This drug is excreted in breast milk. Before you start breastfeeding, talk to your doctor.

#### **Side Effects of Medication**

The majorities of side effects are minor and will go away as your body adapts to the medication. If they don't go away or you're worried, consult your doctor.

- It's possible that you'll get constipation or stomach discomfort. Tell your doctor right away if any of these side effects continue or worsen.
- If your doctor has prescribed Calcium Carbonate & Vitamin D3 Tablet, keep in mind that your doctor has determined that the advantage to you exceeds the risk of adverse

effects. The majority of people who take this medicine do not have any substantial adverse effects.

- If you experience nausea/vomiting, appetite loss, unusual weight loss, mental/mood changes, signs of kidney problems, muscle pain, headache, frequent thirst, frequent urination, weakness, tiredness, or irregular heartbeats, contact your doctor right away.
