Product Description :

What is Levocetirizine 5 mg & Montelukast 10 mg Tablet?

Levocetirizine & Montelukast tablet is used to treat sneezing and runny nose brought on by allergies, hay fever, and allergic skin disorders

How it Works

Levocetirizine & Montelukast Tablet is a combination of two medications that treat runny nose and sneezing brought on by allergies. An antiallergen, levocetirizine, blocks the chemical messenger (histamine) that causes a runny nose, watery eyes, and sneezing. A leukotriene antagonist, montelukast. By obstructing another chemical messenger, it functions (leukotriene). This alleviates symptoms by decreasing inflammation (swelling) in the lungs and nose.

Common side effects of Levocetirizine & Montelukast

The majorities of side effects are minor and will go away as your body adapts to the medication. If they don't go away or you're worried about them, see your doctor.

- Diarrhoea, mouth dryness, exhaustion, headache, drowsiness, nausea, constipation, abdominal pain medial otitis (infection of the ear), Influenza
- Remember that your doctor provided Levocetirizine & Montelukast tablet because he or she believes the advantage to you exceeds the risk of adverse effects. The majority of people who take this medicine do not have any substantial adverse effects.

Some Tips For Levocetirizine & Montelukast

- Levocetirizine & Montelukast tablet have been prescribed for you to treat allergy symptoms such as a drippy nose, sneezing, itchy eyes, and cough.
- It may make you feel lightheaded and sleepy, so use caution if you're driving or performing any other task that calls for concentration.
- It should not be taken with alcohol as it may enhance drowsiness.
- Among the negative effects is possible to dry mouth. Regular mouthwash, improved oral hygiene, more water consumption, and sugarless confectionery may be beneficial.
- Levocetirizine & Montelukast should be stopped at least three days prior to an allergy test as they may alter the results.
