

Adapalene & Clindamycin Phosphate Gel

Product Information :

Pharmaceutical form : External Preparation

Category : OTC

Pack : 1x15gm

Brand name : Adapalene & Clindamycin
Phosphate Gel

Content : Adapalene (0.1% w/w) + Clindamycin
(1% w/w)

Therapeutic Use : Treatment of Acne

Product Description :

What is Adapalene & Clindamycin Phosphate Gel?

Adapalene & Clindamycin Phosphate Gel is an acne treatment medicine that belongs to the 'antiacne' class of dermatological medicines (pimples). Acne is a common skin disorder in which hair follicles become clogged with dead cells and oil. The bacterium that causes acne feeds on sebum (the natural oil generated by the skin), producing inflammation and redness.

How it Work

ADAPALENE+CLINDAMYCIN is a combination of 2 medications, Adapalene (human-made vitamin A) and Clindamycin (antibiotic), that loosens cells on the skin's surface and unblocks pores by lowering oil production in the skin, minimizing the formation of pimples, whiteheads, and blackheads on the surface of the skin. Clindamycin belongs to a class of antibiotics that work by preventing the development of key proteins required for bacteria to grow, reproduce, and multiply. Overall, it inhibits or delays the growth of germs while also preventing acne.

How to Use

- Only use Adapalene & Clindamycin Phosphate Gel for external use. Apply a thin layer of gel on the clean and dry affected area using a minimal quantity of on the finger.
- Hands should be washed before and after using it. Wash the afflicted area with water before using it. Before retiring to bed, apply a thin layer of this medication to the clean and dry afflicted area of the skin and gently rub it in.
- It should not come into contact with the nose, ears, mouth, or eyes. If it accidentally come into contact with these places, thoroughly rinse with warm water.
- Based on your health condition, your doctor will tell you how often you should use this gel.
- Skin peeling, dry skin, inflammation, redness, itching, or burning sensations may occur at the application site in some situations. The majority of these side effects do not need medical care and fade away with time.

Precautions - Adapalene & Clindamycin Phosphate Gel

- Please inform your doctor if you are sensitive to it or any other medications. Cuts, open wounds, broken, sunburned, or sensitive skin should not be treated with Adapalene & Clindamycin Phosphate Gel.
- Sun exposure should be avoided when using it since it may make your skin more susceptible to sunlight and risk sunburn. When going outside, use protective clothing and apply sunscreen to avoid becoming sunburned.
- Consult your doctor before using this medication if you are pregnant or breastfeeding. Do not take it in large doses or longer than recommended because it does not produce faster or better outcomes and instead raises the chance of adverse effects like redness, irritation, and skin peeling, or pain.
- Please consult your doctor before using this medication if you have intestinal problems or eczema.

Side Effects

- Adapalene & Clindamycin Phosphate Gel, like many drugs, can produce typical side effects such as skin peeling, dry skin, irritation, redness, stinging, or burning at the application site.

- The majority of adverse effects do not require medical treatment and fade away with time. If the adverse effects do not go away, please notify your doctor.

Some Tips for Using

- Apply a small layer to acne-prone skin that is clean, dry, and undamaged.
- It's best not to get it in your mouth or eyes. If this happens, quickly rinse with water.
- Apply to regions of skin that are damaged, sunburned, or sensitive. If you detect unusual dryness, redness, or peeling of the skin, contact your doctor.
- It increases your skin's sensitivity to sunlight. When going outside, use sunscreen or wear protective clothing.
- If you have a pregnancy, planning for pregnancy, or breastfeeding, tell your doctor.

Adapalene & Clindamycin Phosphate Gel Supplier

Healthiza is one of the leading Adapalene & Clindamycin Phosphate Gel supplier and manufacturer, offering the best quality medicine globally through a validated cold chain secure shipment process. We use this process to manufacture, store and deliver medicines at a very specific temperature. Customers can avail of this premium quality pharma product at an affordable price from us.
