

# Valproic Acid 500 mg CR Tablets

## Product Information :

---

**Pharmaceutical form :** Tablet

**Category :** Prescription Medicine

**Pack :** 1x10

**Brand name :** Valproic

**Content :** Valproic Acid 500 mg CR Tablets

**Therapeutic Use :** Bipolar Disorder

## Product Description :

---

### What is Valproic Acid Tablet?

Valproic acid tablet is used alone or with other medicines in the treatment of certain types of seizures. In persons with bipolar disorder, valproic acid is also used to treat mania (episodes of frenetic, unusually enthusiastic mood) (episodes of depression, episodes of mania, and other abnormal moods). It's also used to minimize migraine headaches, but not to treat them after they've started. Anticonvulsants are a type of drug that contains valproic acid. It works by boosting the levels of a natural chemical in the brain.

### How to Use

- Every day, around the same time(s), take valproic acid tablet. It should be taken with food to avoid stomach distress.
- Do not split, chew, or crush the extended-release tablets; swallow them whole.
- The body absorbs valproex sodium, valproate sodium, and valproic acid products in various ways and they cannot be swapped for one another. Your doctor may need to

change your dose if you need to transition from one product to another. Check that you have acquired the medication that was prescribed each time you get your medication.

- Your doctor may begin by giving you a small dose of valproic acid and slowly increase it.
- Valproic acid may aid in the management of your illness, but it will not eliminate it. Even though you feel fine, keep taking valproic acid. Your doctor will most likely progressively reduce your dose.

#### **Precaution - Valproic Acid Tablet**

- Tell your doctor about any prescription and nonprescription medications, vitamins, nutraceuticals, and herbal products you're using or planning to use. Your doctor will need to adjust your prescription dosages or keep a close eye on you for adverse effects.
- If you're breastfeeding, let your doctor know.
- Tell your doctor or dentist that you are getting valproic acid if you are getting surgery, including dental surgery.
- You should be aware that valproic acid tablet can cause drowsiness. Do not operate machinery or drive a car until you understand how this medicine affects you.
- If you have or have ever had moments of confusion and loss of capacity to think and concentrate, specifically during pregnancy or childbirth; coma (loss of consciousness for an extended period of time); difficulties coordinating your movements; or human immunodeficiency virus (HIV), tell your doctor
- You should be aware that it might cause significant sleepiness, which may lead to you eating or drinking less than usual, especially if you are older. If you are unable to eat or drink normally, contact your doctor.
- While receiving this medicine for the treatment of epilepsy, mental illness, or other disorders, you should be aware that your mental health may alter in unexpected ways, and you may become suicidal (harming or killing yourself).

#### **Benefit of Valproic**

- Valproic Acid Tablet reduce the frequency of electrochemical signals in the brain that

trigger seizures.

- It can also help with symptoms including bewilderment, jerking movements that are out of control, loss of awareness, and fear or worry.
- The drug may enable you to engage in activities that you might otherwise be prohibited from or fearful of (swimming and driving).
- This treatment takes a few weeks to work, and you may still suffer seizures during that period. Even if you feel fine, do not stop taking this prescription until your doctor tells you to. Missed dosages can cause a seizure.

#### **Side Effects - Valproic Acid Tablet**

The majorities of side effects are minor and will go away as your body adapts to the medication. If they don't go away or you're worried about them, see your doctor.

- Diarrhea, dizziness, tiredness, hair loss, blurred/double vision, menstrual cycle changes, shakiness, unsteadiness, and weight fluctuations are all possible side effects.
- Remember that your doctor recommended this medication because he or she believes the advantage to you exceeds the risk of adverse effects. Many persons who use this medicine have no major adverse effects.
- A limited percentage of patients using anticonvulsants for any reason (seizures, bipolar illness, pain, etc.) may develop depression, suicidal thoughts, or other mood issues.

#### **Some Tips for Using**

- Valproic Acid Tablet has been recommended for the treatment and prevention of seizures.
- To maintain constant levels in your body, consume it at the same time every day.
- Do not drive or do anything else that demands mental focus until you have a better understanding of how Valproic impacts you.
- When using Valproic Tablet, avoid drinking alcohol because it may produce excessive tiredness or drowsiness.
- It might cause weight gain, therefore keep track of your weight during therapy.

- Throughout your treatment, your doctor may check your Valproic Acid Tablet level, blood counts, and liver function. Fever, stomach ache, nausea, or yellowing of the eyes or skin should all be reported to your doctor.
- If you are pregnant, expecting to become pregnant, or breastfeeding, do not use Valproic Acid Tablet.
- Stopping the medicine quickly without consulting your doctor may increase the frequency of seizures.

#### Valproic Acid Tablet Supplier

Healthiza is one of the leading Valproic Acid Tablet supplier and manufacturer, offering the best quality medicine globally through a validated cold chain secure shipment process. We use this process to manufacture, store and deliver medicines at a very specific temperature. Customers can avail of this premium quality pharma product at an affordable price from us.
